AXR In-Cab LCD Display

AXR-2000

AXR-2000

AXR in-Cab LCD Display

The AXR In-Cab LCD Display wirelessly pairs with AXM or AXS Truck Scales to show real-time axle group weights. It supports simultaneous display of up to three axle groups along with the Gross Combination Mass (GCM).

Designed to fit a standard 52mm gauge hole or cup, the AXR offers seamless installation.

To ensure compatibility, AXM Truck Scales must be equipped with a BTE chip version 2.3 or higher and firmware version 2.14 or later.

Packed with advanced Bluetooth technology, this next-generation in-cab display delivers instant access to weight data, offering faster, clearer, and more efficient monitoring from a single screen.
